

# Ini-ubong Isemin Enyinna

BACKEND DEVELOPER (PYTHON, DJANGO REST FRAMEWORK)

Mainland, Lagos | 08101859094 | eugeneinie@gmail.com |  
linkedin.com/in/iniubongisemin | portfolio: <https://iniubongisemin.vercel.app/>

## Objective

To secure a challenging backend engineering position within a dynamic and innovative organization where I can leverage my expertise building and maintaining scalable, high-performance, robust and efficient APIs. I am an extremely adaptable developer who enjoys learning new things, staying abreast with industry trends and devoting quality time to critical thinking.

## Experience

Mentorled, UK | Backend Developer |

Jan 2024 – May 2024

- Led a cross functional team of Designers, Backend and Frontend Developers to build the MVP (Zlide: A web application that utilizes AI to seamlessly generate PowerPoint slides).
- Developed the core logic for slide generation, utilizing NLTK to process text.
- Developed the core logic for User signup, User Login, Google login.
- Created all the API endpoints for the web application.
- Set up Postgres database, deployed the application to Vercel and hosted the server on railway.
- Managed and tracked my team's progress and ensured performance.
- Motivated teammates by fostering good rapport and maintaining constant communication throughout the project timeline.
